Re: Whitewater Lake Subwatershed Study and Master Plan  
Public Meeting #2

Dear Mr. Javor:

The Vermilion River Stewardship is very pleased to offer feedback on the Whitewater Lake Subwatershed Study and Master Plan.

These Public Information Centre panels are very high level, so at this time there isn't too much to comment on; however, it is important to consider the Chelmsford Wastewater Treatment Facility in this assessment.

It is also important to emphasize the importance of planning for a warming climate by building resilience into whichever alternative/s are chosen. In this vein, planning should be based on at least a 1:200-year storm event, and preferably a 1:1000-year flood event for true resilience to climate change.

Please register the Vermilion River Stewardship as a stakeholder in all of the Subwatershed studies.

Thank you for this opportunity to comment!

Respectfully,

A handwritten signature in black ink, appearing to read "L. Heron". The signature is fluid and cursive.

Linda Heron  
Chair, Vermilion River Stewardship
